📁 WORK EXPERIENCE

Software Engineer, Whitespectre ✍

08/2022 – present | Barcelona, Spain

- Allocated at a growing food industry player in the United States.
- Collaborated with other colleagues architecting a React Native app, integrating various existing functionalities from the web solution into the app.
- Prioritized the use of recent technologies, putting best practices into effect, and giving optimization and scalability priority, this directly contributed to its **high stability** and **exceptionally low error rates** in production.
- Actively engaged in cross-team knowledge sharing through writing and speaking engagements.
- Technologies: React Native, React, Redux, Firebase, Codepush, Bitrise.

Tech Lead | Senior Mobile Engineer, Wiser Educação ✍

07/2020 – 08/2022 | Curitiba, Brazil

- Spearheaded a fullstack team to develop new features and maintain WiseUp Online App, a language learning platform with over **300,000 users**.
- Performed code reviews, estimates, and planning of deliveries with the team.
- Developed essential user engagement features like "Listen and Speak", "Download Video Support", and "MultiProfile" for the WiseUp Online App.
- **Led the migration of the WiseUp Online codebase** from Javascript to TypeScript, transitioning from Class to Functional Components.
- Technologies used: React Native, Redux, Next.js, Firebase, Styled Components, Husky, ESLint, Prettier, and Codepush.

Founder, RevisApp ✍

03/2017 – present | Curitiba, Brazil

- Created and architected RevisApp, an educational application focused on High School students.
- Currently, has **2,000,000+** downloads and **120,000 active users**, with a rating of **4.7 out of 5** on the Play Store and **4.5 out of 5** on the App Store, with a very low error rate and resource utilization.
- The App is implemented in a way to be Offline First, using RealmDB and Firebase Firestore.
- Developed the purchase flow using the Store payment API on iOS and Android together with a custom API
- CI implementation and testing, with AppCenter and React Testing Library.

🎓 EDUCATION

Information Systems, UTFPR ✍

06/2018 – 12/2024 | Curitiba, Brazil

🏆 AWARDS

NASA SpaceApps Hackaton ✍

1st place in the "O Boticário" category with the Trashfy project, developed using React Native.

Product of The Day ✍

4th place in Product Hunt with Strackify, developed using React Native and NodeJS.

📖 COURSES

Software Architecture, IGTI Bootcamp

Bootcamp focused on architectural requirements, design patterns, architectural patterns and styles.

Design System in Code, Meiuca

A Meiuca's course entirely focused on developers where you will learn how to consume and collaborate with a Design System from the point of view of a code person.

Ignite, Rocketseat

A Bootcamp focused on Fullstack development, using React, React Native and NodeJS.

📁 PROJECTS

react-native-auto-size-text, React Native Lib ✍

A React Native library component for Android and iOS that provides several ways to resize text within a certain dimension/parent. Currently with 55 GitHub stars.

react-native-color-toolkit, React Native Lib ✍

A well-tested library written in typescript with a lot of tools to help mobile developers who care about color.

Open Source Contributions

Contributions to open source libraries such as: **react-native**, **react-navigation**, **react-native docs**, **react-native-spotify-remote**, **react-native-render-html** and **flutter_js**.
